PROFESSIONAL SUMMARY

Python-focused software engineer with 2+ years of experience developing scalable backend systems, data-driven applications, REST APIs, and automation-oriented solutions using Python, Django, Django REST Framework, SQL, PostgreSQL, and MySQL. Experienced in database design, SQL query optimization, indexing, API integration, asynchronous background processing, caching, and Docker-based deployments. Hands-on exposure to Pandas, NumPy, Scikit-learn, and machine-learning based application development through AI-enabled projects. Strong foundation in data processing, backend architecture, system performance, debugging, and Agile collaboration, with an interest in building reliable data products and automation solutions.

WORK EXPERIENCE

1) Inflox Technologies - Python/Django Developer | June 2021 - September 2022 | Kochi, India

- Developed scalable backend systems using Python, Django, and DRF for enterprise applications.
- Designed and maintained RESTful APIs to integrate frontend interfaces with third-party services.
- Optimized SQL queries and database schemas, improving system performance by 30%.
- Engineered complex data models with Django ORM to ensure data integrity and efficient storage.
- Implemented secure authentication and RBAC protocols for granular API access control.
- Resolved production bugs and performance bottlenecks to enhance system stability and uptime.
- Managed CI/CD pipelines and deployment cycles, including unit testing and performance tuning.
- Collaborated in Agile teams on sprint planning, code reviews, and debugging strategies.
- Utilized Git and GitHub for version control and streamlined team collaboration workflows.

2) Makbig Learn Hub - Python/Django Developer (Internship) | September 2025 – February 2026 | Kannur, India

- Engineered Django-based backend services and REST APIs to power data-driven web applications.
 - Optimized PostgreSQL and MySQL database performance through advanced indexing and SQL query refinement.
 - Built modular, reusable backend components to enhance system maintainability and development efficiency.
 - Facilitated seamless frontend-backend integration using React, JavaScript, and asynchronous AJAX calls.
 - Executed rigorous application testing and debugging to streamline deployment and resolve production issues.
 - Contributed to Agile workflows, participating in sprint planning, peer code reviews, and cross-functional QA.
 - Implemented structured error-handling practices to significantly improve overall application reliability.
-

EDUCATION

1) Master of Computer Applications (MCA) - Indira Gandhi National Open University | 2024 - Present | Delhi, India

2) Bachelor of Computer Applications (BCA) - University of Calicut | June 2018 - March 2021 | Calicut, India

TECHNICAL SKILLS

Programming & Data:

Python, SQL, JavaScript, Pandas, NumPy, Scikit-learn

Data & Database Engineering:

PostgreSQL, MySQL, SQLite, Database Design, Data Modeling, Database Normalization, SQL Query Optimization, Indexing, Transactions, Database Performance Tuning, Django ORM

Backend & APIs:

Django, Django REST Framework, REST APIs, API Integration, JSON, HTTP/HTTPS, API Versioning, OpenAPI, Authentication, Authorization, RBAC

Data Processing & Automation:

Celery, Redis, Background Tasks, Asynchronous Programming, Caching, AJAX, Third-Party API Integration, File Processing, Email Integration

AI / Machine Learning:

Machine Learning Fundamentals, Scikit-learn, NumPy, Pandas, Joblib, Model Training, AI-enabled Application Development

Cloud, DevOps & Deployment:

Docker, Docker Compose, Git, GitHub, GitHub Actions, CI/CD, Nginx, Gunicorn, AWS EC2/S3/IAM (Basic), Google Cloud Platform (Basic), Render, Vercel

Engineering Practices:

OOP, SOLID Principles, MVT Architecture, Data Structures & Algorithms, Agile/Scrum, Debugging, Logging, Error Handling, Secure Coding, Performance Optimization, Unit Testing, Integration Testing, API Testing

PROJECTS

1. FITBUDDY AI Fitness Assistant

[GitHub](#) | [Live](#)

Tech Stack: Python, Django, Django REST Framework, MySQL, Scikit-learn, Joblib, ML, HTML, CSS, Bootstrap, JavaScript, AJAX

- Architected a scalable Python/Django backend for AI-integrated fitness solutions.
- Built secure REST APIs for authentication, profile management, and data processing.
- Integrated Scikit-learn and Joblib for AI-driven model functionality.
- Implemented structured database modeling for personalized fitness experiences.
- Optimized SQL queries, reducing application latency by 20%.
- Designed modular architecture to ensure backend maintainability and scalability.
- Managed deployment using Gunicorn and Nginx on Render.

2. Warehouse Management System

[GitHub](#) | [Live](#)

Tech Stack: Python, Django, PostgreSQL, HTML, CSS, Bootstrap, JavaScript, AJAX

- Designed normalized PostgreSQL schema for inventory, supplier, and order management.
- Engineered secure REST APIs for seamless data processing and workflows.
- Implemented robust RBAC for secure data access.
- Optimized SQL queries and indexing, significantly boosting retrieval speeds.
- Built dynamic AJAX-based interfaces for real-time backend interaction.
- Structured modular backend workflows focused on high-reliability data management and complex transactional operations.

3. E-Commerce Web Application

[GitHub](#) | [Live](#)

Tech Stack: Python, Django, MySQL, HTML, CSS, Bootstrap, JavaScript, AJAX

- Developed backend services for product catalogs, carts, secure checkout, and order management.
- Optimized MySQL architecture and SQL queries to enhance data processing efficiency.
- Implemented secure user authentication, address management, and end-to-end order lifecycle logic.
- Built dynamic cart functionality using asynchronous updates for a seamless user experience.
- Improved system performance via advanced database indexing and query optimization.
