

ADITHYAN M

Python Full-Stack /Django Developer

Mail id: Adithyan M | **Phone:** +918921391935

Location: Calicut,Kerala | **Portfolio :** <https://portfolio-frontend-ebon-sigma.vercel.app/>

LinkedIn: [linkedin.com/in/adithyanm274](https://www.linkedin.com/in/adithyanm274) | **GitHub:** github.com/adithyanm274

PROFESSIONAL SUMMARY

Python/Django Developer with 1.5+ years of hands-on experience in building scalable web applications and **RESTful APIs using Python, Django, and Django REST Framework** . Strong expertise in **authentication, ORM optimization, PostgreSQL/MySQL, and API-driven architectures**. Proven ability to collaborate with front-end teams, deploy cloud-ready applications, and follow clean coding and Agile best practices.

WORK EXPERIENCE

1. Infox Technologies - Python/Django Developer | June 2021 - September 2022 | Kochi, India

- Developed and maintained production Django web applications with integrated REST APIs (DRF) for frontend-backend communication.
- Designed and optimized MySQL schemas for improved query performance; implemented authentication, authorization, and form validation.
- Enhanced UX with AJAX/JavaScript dynamic updates; used Git version control and collaborated in an Agile environment.
- Assisted in deployment and testing across local and cloud environments.

2. Makbig Learn Hub - Python/Django Developer (Internship) | September 2024 – February 2025 | Kannur, India

- Developed RESTful APIs and real-time features using Django REST Framework & Django Channels, integrating with React frontends.
 - Implemented user authentication, form handling, and data validation.
 - Designed and maintained PostgreSQL/MySQL databases with optimized relational models.
 - Built responsive web interfaces (HTML, CSS, JS, Bootstrap) and collaborated in a cross-functional team to deliver scalable solutions.
-

EDUCATION

- | | |
|---|-------------------------|
| 1. Master of Computer Application (MCA) (Ongoing) | December 2023 – Present |
| Indira Gandhi National Open University (IGNOU) – Delhi, India | |
| 2. Bachelor of Computer Application (BCA) | June 2018 –March 2021 |
| University of Calicut – Calicut, India | |
-

TECHNICAL SKILLS

Programming Languages: Python, JavaScript

Frameworks & Libraries: Django, Django REST Framework (DRF), Django Channels

Databases: PostgreSQL, MySQL (ORM, Query Optimization)

Web Technologies: HTML5, CSS3, Bootstrap, AJAX, React

Authentication & Security: JWT, OAuth2, CSRF Protection

Version Control: Git, GitHub, Virtualenv

API & Backend Concepts: RESTful APIs, API Integration, Authentication & Authorization, OAuth2, CSRF Protection, CRUD Operations

Software Development Concepts: MVC/MVT Architecture, Database Design, ORM Optimization, Unit Testing, Agile/Scrum, Object-Oriented Programming (OOP)

Deployment : Render, Web Application Deployment, CI/CD Basics, Vercel

Soft Skills : Problem-solving and analytical thinking, Cross-team collaboration in Agile environments, Time management and task prioritization, Clear technical communication

PROJECTS

1. FITBUDDY AI Fitness Assistant

(<https://portfolio-frontend-ebon-sigma.vercel.app/videos/project%20recording.mp4>)

Tech Stack: Python, Django, Django REST Framework, MySQL, Scikit-learn, Joblib, HTML, CSS, Bootstrap, JavaScript, AJAX

- Developed an AI-powered fitness recommendation system that generates personalized workout plans based on user goals and fitness levels.
- Built and integrated machine learning models (Scikit-learn) for workout prediction and difficulty classification, served via Django REST APIs.
- Implemented user authentication, workout tracking, and an admin dashboard, with optimized MySQL queries for performance.
- Deployed the application on Render cloud platform with production-ready configuration.

2. Warehouse Management System (<https://warehouse-01hp.onrender.com/>)

Tech Stack: Python, Django, PostgreSQL, HTML, CSS, Bootstrap, JavaScript, AJAX

- Built a full-featured warehouse operations platform with supplier/buyer registration, product catalogues, seasonal drops, order tracking, and delivery management.
- Implemented role-based access (admin vs read-only users) and integrated Django's authentication system for secure, role-specific control.
- Designed optimized PostgreSQL relational models with Django ORM for high data integrity and performance.
- Created responsive, AJAX-powered interfaces for real-time updates, and deployed the application on Render with production-ready settings.

3. E-Commerce Web Application (<https://e-commerce-web.onrender.com>)

Tech Stack: Python, Django, MySQL, HTML, CSS, Bootstrap, JavaScript, AJAX

- Built a full-featured e-commerce platform with product catalog, category filtering, dynamic cart, and complete order lifecycle.
- Implemented user authentication, address management, and order processing using Django's built-in modules and class-based views.
- Designed and optimized MySQL database schemas for efficient query performance, including persistent cart logic with real-time quantity and total calculations.
- Integrated Django messages framework and GET-based cart operations for smooth user feedback and seamless checkout flow.
