

# ADITHYAN M

## Python Full-Stack /Django Developer

**Mail id:** adithyan.m.2742001@gmail.com | **Phone:** +918921391935

**Location:** Calicut, Kerala | **Portfolio :** <https://portfolio-frontend-ebon-sigma.vercel.app/>

**LinkedIn:** [linkedin.com/in/adithyanm274](https://www.linkedin.com/in/adithyanm274) | **GitHub:** [github.com/adithyanm274](https://github.com/adithyanm274)

---

### PROFESSIONAL SUMMARY

Results-driven **Python Full Stack Developer** with **1.5+ years of experience** building scalable web applications and RESTful APIs using **Django and Django REST Framework**. Strong expertise in **database design, API development, authentication systems, and performance optimization**. Proven ability to deliver production-ready applications, collaborate in Agile teams, and deploy cloud-based solutions.

---

### WORK EXPERIENCE

#### 1. Infox Technologies - Python/Django Developer | June 2021 - September 2022 | Kochi, India

- Developed and maintained **scalable Django web applications**, supporting smooth frontend-backend communication via REST APIs.
- Optimized **MySQL database queries**, improving performance by approximately 25–30% and reducing response time.
- Implemented secure **authentication and authorization systems**, ensuring safe user data handling.
- Enhanced user experience with **AJAX-based dynamic updates**, improving UI responsiveness.
- Collaborated in an **Agile development team**, using Git for version control and efficient code management.
- Assisted in **deployment and testing**, ensuring stable performance across environments.

#### 2. Makbig Learn Hub - Python/Django Developer (Internship) | September 2024 – February 2025 | Kannur, India

- Built and deployed **RESTful APIs and real-time features**, improving application responsiveness by 20%+.
  - Implemented **secure user authentication and validation systems** for reliable backend operations.
  - Designed and optimized **PostgreSQL/MySQL databases**, ensuring efficient data handling and performance.
  - Developed responsive frontend interfaces using **HTML, CSS, JavaScript, Bootstrap, and React**.
  - Collaborated with cross-functional teams to deliver **scalable and maintainable applications**.
- 

### CAREER DEVELOPMENT (2023 – 2025)

- Pursued Master of Computer Applications (MCA) while strengthening backend development skills.
- Built multiple real-world Django projects and improved knowledge in APIs, databases, and deployment.
- Focused on problem-solving, system design basics, and performance optimization techniques.

## EDUCATION

- |                                                               |                         |
|---------------------------------------------------------------|-------------------------|
| 1. Master of Computer Application (MCA) (Ongoing)             | December 2023 – Present |
| Indira Gandhi National Open University (IGNOU) – Delhi, India |                         |
| 2. Bachelor of Computer Application (BCA)                     | June 2018 – March 2021  |
| University of Calicut – Calicut, India                        |                         |
- 

## TECHNICAL SKILLS

**Programming Languages:** Python, JavaScript

**Frameworks & Libraries:** Django, Django REST Framework (DRF), Django Channels

**Frontend Technologies:** HTML5, CSS3, Bootstrap, AJAX, React

**Databases:** PostgreSQL, MySQL

**API & Backend Development:** RESTful APIs, API Integration, CRUD Operations

**Authentication & Security:** JWT, OAuth2, CSRF Protection, Authentication & Authorization

**Software Development Concepts:** MVC/MVT Architecture, Object-Oriented Programming (OOP), Database Design, ORM Optimization, Unit Testing, Agile/Scrum

**Tools & Version Control:** Git, GitHub, Virtualenv

**Deployment & DevOps:** Render, Vercel, CI/CD Basics, Web Application Deployment

**Soft Skills :** • Problem-solving & analytical thinking • Effective communication in cross-functional teams • Time management & task prioritization

---

## PROJECTS

### 1. FITBUDDY AI Fitness Assistant

(<https://portfolio-frontend-ebon-sigma.vercel.app/videos/project%20recording.mp4>)

**Tech Stack:** Python, Django, Django REST Framework, MySQL, Scikit-learn, Joblib, HTML, CSS, Bootstrap, JavaScript, AJAX

- Developed an **AI-powered fitness recommendation system** generating personalized workout plans.
- Integrated machine learning models for **prediction and classification**, improving recommendation accuracy.
- Built secure REST APIs and implemented **user tracking and authentication systems**.
- Optimized database queries, improving performance by approximately **20%**.
- Deployed application on **Render cloud platform** with production-ready setup.

### 2. Warehouse Management System (<https://warehouse-01hp.onrender.com/>)

**Tech Stack:** Python, Django, PostgreSQL, HTML, CSS, Bootstrap, JavaScript, AJAX

- Built a complete system for **inventory management, order tracking, and supplier handling**.
- Implemented **role-based access control (RBAC)** to enhance security and data control.
- Designed optimized PostgreSQL schemas, improving **data retrieval efficiency by ~25%**.
- Developed AJAX-based interfaces for **real-time updates and better user experience**.
- Deployed scalable application with production-ready configuration.

### 3. E-Commerce Web Application (<https://e-commerce-web.onrender.com>)

**Tech Stack:** Python, Django, MySQL, HTML, CSS, Bootstrap, JavaScript, AJAX

- Developed a full-featured e-commerce platform with **cart, checkout, and order management system**.
- Implemented **authentication, address management, and order lifecycle handling**.
- Designed efficient MySQL queries, improving **data processing performance by ~20%**.
- Built dynamic cart system with **real-time updates and seamless checkout flow**.
